ABOUT ME

I'm an aspiring software developer driven by my passion for problem-solving. My journey into the world of programming started with online courses and personal projects centered around Python. Following my first professional experience as a front-end developer intern, I have concentrated my efforts on web development. Currently, I am working at Etstur as a software development assistant.

EXPERIENCES

JUL 25, 2022 - PRESENT
Etstur

SOFTWARE DEVELOPMENT ASSISTANT EXTRANET

I work in a team dedicated to modernize Etstur's B2B hotel management application. Originally built using Java and FTL, the project is now undergoing a transition to a React and Java Spring Boot stack to enhance user experience and functionality.

CONTRACT PROJECT

I played a significant role as the primary front-end developer in Etstur's new contract digitalization and flow management application from its initial stages to its successful production launch. The project set a precedent as to be the first fully React-based front-end application to reach production within the company.

Following its launch to production, I transitioned to Etstur's Extranet project, but still played a key role in facilitating knowledge transfer and provided assistance to the newly formed front-end developer team, ensuring the project's continued success.

OCT 2021 - NOV 2021
1Pixel Digital Agency

FRONT-END DEVELOPER INTERN

Coding functional and responsive sections of pages in HTML based on provided page designs, integrating these sections into Shopify themes to provide customizable components to merchants, and integrating dynamic store data into page elements using Shopify Liquid templating language.

MAY 2020 - AUG 2021
Freelancer.com

FREELANCE VIDEO EDITOR

Editing & creating advertisement, music and presentation videos for clients.
